Charehill-Eampsen.

Charles Lealle Churchill of this town and Miss Revita Sampson of Docktand were united in marriage Weslnewing year. 63th, at the home of liev. L. W. Attwood, Tower avenne. After the ceremony the couple were escented to the inome of the groom, where they were entertained by an orchentar representing the K. A. U. of which the groom is member, C. E. flolidrook officiating as leader. A selected quartel sang many appropriate songs for the occasion, and the evening was very thesandly passed. Mr. and Mrs. Churchill were the recipients of many useful presents. Old Colony Club.

When once you have won a hird's confidence and feel on intimata terms with him, it will surprise you to fad what a wonderfully interesting little ritop he is. The plainest and commonest kind has a molifitude of strange and interesting habits you have never dreamed of, and even the despised English sparrow will exhibit traits of lotelligence and affection which will at once win for him a warm corner in a your heart. Bird life is not all pleasure and aunshine, by any means, are and aunshine, by any means, are and aunshine, by any means, and many a wee hird finds life just as serious a problem as we humans. Comedy and humor there is, too, and some species seem actually to apprehentate a joke. On one occasion, while watching a busy downy woodpecker industriously boring for grubs, a sharpshine hawh dashed by my face attaight for the little drummer. ripening of the leaves. Leaves are green in spring and summer because they have in the cells a substance called chlorophyli, which is made green by the action of sunlight. The green is not applied and it is not fully formed. When that substance is fully formed. When that substance is fully tormed the green turos derker.

Toward the end of summer the rhiorophyli begins to decay, and then, because it is not supplied as it is early in the ecason, the leaves change color or ripen, the green producing substance no longer being present. Exactly why some leaves turn red, some yellow and some brown is not readily explained, except hy what we know of the action of light in producing colors. Some substances absorb the yellow and blum rays nf light and reflect the red; others alsorb the red and blue rays and reflect the vellow; and so on. The scientifie reason why some rays are absorbed and others are reflected is that the corpuscies of the substance vary in size. This applies not only to leaves but to all colored objects.

Some confusion has arisen in the mind of the general public levenuse of the two relations statained by the Voning People's Society of Christian Radeavar. Somethy a lib supskers of as a local society owing alleglance only to one local church, and so it is. Somethies it is speken of as a world wide movement with relations to all the churches, and so it is. Inthe relations are correct, and neither excludes the other. In fact, both are recessary to the high six development of either.

What is the chief and of Phristian Endeavor as a society? To start with the phrusology of the old entechism, its chief and is to glerily ited, and taild up the local church with which it is connected. Out of 1800 ministers interessed the drayally of their young people to their own church, like percent declared that the Interdemontational followship was only a help and not a lindquare, and those some industrative clared that 47 percent of the mesossions to their couractus had come from the ranks of the Christian Endeavor is a moy.

A Typical South African Store.

O. M. Larson, of Bay Ville, Semilays River, Cape Chlony, confincts a store typical of flowth Africa, at which can be purchased anything from the provertial "needle to an anchor." This store is situated in radiey nine miles from the naturest railway station and absent twenty-five miles from the natural form. In. Larson says: "I am forced with the conton of farmers within a radies of thirty miles, to many of whem I have supplied Chambertain's remedies. All testify to their value in a homeshed where it dector's advice in almost one of the question. Within one mile of my store the population is perhaps sixty. Of these, within the past twelve member, as except the population is perhaps sixty. Of these, within the past twelve member, as the cast than fourteen harn been absolutely curved by Chambertain's Cough Research. This must surely be a record." For sale by all druggiets. We all reasember the old style Bed Lounge, hard, unconfortable, not pleasant to sleep on and difficult to keep in a sanitary condition. For years it has fuffilled its mission, but now gives way to the modern bed concle. Contrast, if you will, the difference. The new couch, all iros frame with luanrious spring and comfurtable mattress. Is the day time, a hand-some couch with loose Turkish cover draped on. At night, a full sized bed, that luvites rest and insures sleep. Hell challing may be kept on the couch beneath the Turkish cover in the day absolutely obscure. It inkes just two seconds to bransfars your couch into a bed. The price is within the reach of everyone. 5 STYLES, \$12.00 TO \$18.00.

Has Been Steadily Roduced Despite the Obstacles Relead by War.

Washington, Oct. 21.—Probably that part of Secretary Gage? Milwankee neiders which will most impress the general public, made up of men who nee anacquainted with the details of banking, is that in which he deals with the public deht. The average reader han neither time nor the opportunity for following the Treasury operations from week to week nad month in month. In a general way he known that the country's credit is "gill edged," and that the Spanish war and "expansion" have and strained our resources or attempts but if is daubiful if he realises that the interest-learing debt of the l'inited States was reduced from \$1.000.000 to 18 per second way with \$1.000.000 to 18 per second war with \$1.000.000 to 18 per second war with \$1.000.000 to 18 per second war with \$1.000 to 18 per second within less than I we years of the signing of the treaty of peace, reduced the taxation that the struggle had rendered necessary, and are now culting down one delf.

Secretary tinge'n solution of the treasury singule is simple, if is a reform our financial legislation in such a way that the government may sipole fluids it does not need with the banks on canditions which secure it and at the same time yield in return without minimizing requirements which me like Iboson the present in men or ancrous. In general the other recommendations of the screening tend to take the government out of the lanking indiness save in its ampervisory expanity, and is free banking from the requirements which the interest of the other recommendations of the screening the requirements which into the requirements which into the montry becomes determined the interest of the heart when the interest ment out of the lanking indiness save in its ampervisory expanity, and is free banking from the requirements which the interest of the outer recommendation of the heart when the present in when the increased with the only when the proper its responsiveness to the business of the country.

It is by chumes that the jury met the moraing. The jurcers not last week, and after business was completed, adjourned until Oct. 24.

It is quite probable, however, that if the jury had not been coming in at this time, the jury is not been coming in at this time, the jury swould have been eat it ingether for this especial purpose, he cause the authorities believe that when the fugility bank men are found it will be io another country. The matter of extradillan will then have to be considered, and it will be a much easier task to have the men brought lock to the United States when it is shown that there was analy a complaint out.

Another reason for the calling together of the jurcers at this time is to adviate the difficulty which might inverte be met in getting the officers of the bank to testify. It is true that that Examiner Ewer has been Through the bank to testify. It is true that that Examiner Ewer has been Through the bank to testify.
